Allowable Subject Matter

Claims 1-28 are allowed.

The following is an examiner's statement of reasons for allowance: the instant application's disclosed prior art discloses a WCDMA system shown in figure 1. The receiver receives a plurality of frames comprising a plurality of slots wherein the time slots comprise symbols and the symbols comprise paths (page 4, lines 6-21). Circuitry is discloses for correlating a primary synchronization code (page 4, lines 6-8). The prior art defines a time slot window 10 shown in figure 1 and a search window 20 where the search window is centered about a path P1. Numerous paths corresponding to peak locations are shown in the spectrum 30. The instant application's disclosed prior art does not disclose the search window is divided into a plurality of sub windows.

Wantanabe (US 6,044,104) discloses dividing a search window into a plurality of search widths (sub windows) as shown in figure 2 but does not disclose wherein each of the sub windows includes at least one of the a plurality of largest amplitude paths represented within the group as stated in claims 1-28. Popovic et al (US 6,370,397) discloses defining a search window with a plurality of peaks representing paths as shown in figure 3. However, Popovic does not disclose dividing the search window into a plurality of sub windows as claimed in claims 1-28.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
